

# MiFi OS™

Applications

## MiFi® DLNA® Server

### With the MiFi DLNA Server, you get a front row seat.

The MiFi 2372 Intelligent Mobile Hotspot enables you to access and play your movies, music and photos anywhere, anytime, on any DLNA-capable device. The MiFi DLNA Server connects your devices to provide easy, instant-on access to your media. There's no complicated configuration required.

### Using your MiFi device you can:

- **Stream movies and music to DLNA-capable devices\*.** Computers, DVD and Blu-ray players, game consoles, mobile devices, audio video systems, digital frames, home theater devices, televisions, tablets and more.
- **Watch with ease.** No need to copy, move, and synch your media files on multiple devices.
- **Watch content on multiple screens.** Watch different movies on different devices at the same time.
- **Browse and share images with friends and family.** Stream photos from your microSDHC™ card inserted in the MiFi device to DLNA enabled media players.
- **Listen to music on multiple devices.** Stream music to multiple audio devices at the same time.

### Enjoy your media wherever you are on the devices you choose.

- Enable devices on the network to find media on your microSDHC card inserted into the MiFi device.
- Browse your content, sorted in various ways.
- Stream movies, music and photos to DLNA-capable devices in real time.

### Making products work together to improve the connected consumer experience.

The MiFi 2372 Intelligent Mobile Hotspot from Novatel Wireless, Inc. is DLNA CERTIFIED®. The Digital Living Network Alliance (DLNA) is a global collaboration of 245 of the world's most trusted brands, all working together to help create the entertainment environment you've always imagined. Novatel Wireless, Inc. is a member of the DLNA.

\*Note: Certain DLNA certified devices, including printers, may not be supported. See [www.dlna.org](http://www.dlna.org) for a complete list.
