MT 2500

GSM/GPRS/GPS Quad-Band Mobile Tracking Device

A low-cost, fully certified mobile tracking device with advanced features.

Part of the Enfora® MT Series, the MT 2500, is a certified quad-band, 3-axis accelerometer integrated device optimized for today's increasing demand for vehicle recovery, fleet management, and driver and vehicle profiling. Providing complete GSM/GPRS communications, the Novatel Wireless MT 2500 helps you track and monitor vehicles from the family car to the largest fleet of commercial vehicles.

FLEET MANAGEMENT

Designed to adapt to multiple vertical markets including fleet, vehicle recovery, insurance, buy-here-pay-here and more, the MT 2500 is the economical solution for enhanced vehicle tracking solutions. With the introduction of the FOTA (Firmware-Over-The-Air) enabled quad band GSM/GPRS device with internal antennas, 3-axis accelerometer, analog inputs and other GPIO (General Purpose Input/Output), the MT 2500 ensures a feature rich solution with low implementation and operation costs.

INSURANCE TELEMATICS

This user-friendly unit captures and monitors information for today's most demanding fleet and vehicle recovery applications, relaying vehicle and driver behavior information on rapid acceleration, harsh braking, speed violations, and excessive idling. An optional battery for communications when power is lost, the MT 2500 is optimized for a host of vertical markets where critical vehicle information is required.

QUICK DEPLOYMENT AND DEVICE MANAGEMENT

Coupled with the robust N4A™ Communications & Management platform, devices can be monitored and reconfigured remotely most anywhere in the world.
